Question: 1

A storage administrator executes the attach-mirror command to add a mirror to a VPLEX local RAID 0. What is the RAID type of the device after the command is executed?

Response:

- A. RAID C
- B. RAID 0
- C. RAID 5
- D. RAID 1

Answer: D

Question: 2

A distributed device is being created from existing devices in Unisphere. What is an important consideration when selecting Do not Synchronize Data - Advanced Users Only?

Response:

- A. It will take longer to finish creating the distributed device
- B. Whether or not the source volume contains data that needs to be preserved
- C. Data has to be synchronized manually with a VPLEXcli command
- D. Select only if source volume contains a virtual device attached to a host

Answer: B

Question: 3

A VPLEX perpetual performance monitor is running on Director 1-1-

A. The data being monitored is growing at a rate of 2 MB per minute. At the current data rate, how far back in time is the monitor able to reach?

Response:

- A. 5 minutes
- B. 50 minutes
- C. 5 hours
- D. 50 hours

Answer: B

Question: 4

In a VPLEX environment, what is a result of a global cache miss?

Response:

- A. A host read could be serviced from the local director cache.
- B. A director must write data to a back-end storage volume from local cache.
- C. A host read could be serviced from the VPLEX global cache.
- D. A director must read data from a back-end storage volume to local cache.

Answer: D

Question: 5

With a VPLEX Metro utilizing FC WAN COM, how many ports on each director are used by default for inter-cluster communication?

Response:

- A. 1
- B. 2
- C. 4
- D. 8

Answer: B

Question: 6

A company uses a VPLEX Metro configuration across two data centers. One night, the WAN COM between the two sites fails. What allows an incremental re-synchronization with the remote device once the link is restored?

Response:

- A. Consistency groups
- B. Logging volumes
- C. Virtual volumes
- D. Metadata volumes

Answer: B

Question: 7

Where is VPLEX Cluster Witness installed?

Response:

- A. Primary cluster only
- B. Third domain
- C. Secondary cluster only
- D. Primary or secondary cluster

Answer: B

Question: 8

In VPLEX, what are some of the main criteria for selecting an active/active architecture versus an active/passive architecture?

Response:

- A. RPO/RTO, distance, and bandwidth between sites
- B. Application performance, storage tiering, and bandwidth between sites
- C. Application performance, distance, and bandwidth between sites
- D. RPO/RTO, storage tiering, and bandwidth between sites

Answer: A

Question: 9

What is the purpose of the "distributed-storage/" sub-context in the VPLEX CLI?

Response:

- A. Create and manage links between clusters, devices, and extents
- B. Create, verify, start, pause, cancel, and resume data migrations
- C. Create and manage distributed devices and rule sets
- D. Configure connectivity between back-end storage arrays and front-end hosts

Answer: C

Question: 10

What is a prerequisite for a company that is interested in setting up VPLEX MetroPoint?

Response:

- A. VPLEX running 5.4 SP1 or above

- B. RPA running 4.0 SP1 or above
- C. ESXi 5.1 or above with a VM
- D. VPLEX Geo

Answer: A
