

Hitachi HCE-5711

Hitachi Vantara Certified Expert - Replication and Migration Solutions Implementation

- Up to Date products, reliable and verified.
- Questions and Answers in PDF Format.

Full Version Features:

- 90 Days Free Updates
- 30 Days Money Back Guarantee
- Instant Download Once Purchased
- 24 Hours Live Chat Support

Latest Version: 6.0

Question: 1

Which migration approach is best suited for third-party storage systems?

Response:

- A. GAD-based migration
- B. NDM-based migration
- C. UVM-based migration
- D. Thin Image migration

Answer: C

Question: 2

Which two factors are critical when configuring remote replication using Hitachi TrueCopy?

(Choose two)

Response:

- A. Replication pairs setup
- B. Host zoning setup
- C. Data consistency options
- D. Snapshots frequency

Answer: A,C

Question: 3

When configuring remote replication, _____ pairs must be defined to ensure accurate data synchronization.

Response:

- A. host
- B. replication
- C. storage
- D. network

Answer: B

Question: 4

Hitachi TrueCopy allows _____ replication between two data centers for disaster recovery.
Response:

- A. synchronous
- B. point-in-time
- C. delta
- D. space-efficient

Answer: A

Question: 5

What are the key benefits of using Hitachi Ops Center Automator during replication implementation?
(Choose two)
Response:

- A. Manual configuration of replication processes
- B. Automated replication provisioning
- C. Integration with third-party storage systems
- D. Task automation and orchestration

Answer: B,D

Question: 6

Command Control Interface (CCI) provides detailed _____ for troubleshooting replication issues.
Response:

- A. logs
- B. provisioning
- C. dashboards
- D. volumes

Answer: A

Question: 7

When sizing a replication solution, which of the following must be considered?

(Choose two)

Response:

- A. Total data volume to be replicated
- B. Backup frequency
- C. Snapshot retention policies
- D. Network topology

Answer: A,D

Question: 8

What is the purpose of using the System Option Mode (SOM) settings during replication implementation?

Response:

- A. To limit replication speeds
- B. To adjust how the replication system interacts with hosts
- C. To define storage limits
- D. To reduce latency

Answer: B

Question: 9

Which two methods can be used to replicate data between data centers in a disaster recovery scenario? (Choose two)

Response:

- A. TrueCopy (TC)
- B. Hitachi ShadowImage (SI)
- C. Thin Image snapshots
- D. Global Active Device (GAD)

Answer: A,D

Question: 10

What are two important considerations when configuring Hitachi ShadowImage for in-system replication?

(Choose two)

Response:

- A. Amount of free space available for replication
- B. The replication bandwidth used
- C. Type of data being replicated
- D. Performance impact on the storage system

Answer: A,D
