- D. Enable automatic volume snapshots

**Answer: A,C**

### Question: 5

How can an administrator recover data from a snapshot in PowerFlex?  
Response:

- A. Use the "Restore Snapshot" option in the GUI
- B. Assign the snapshot to a protection domain
- C. Replicate the snapshot to another cluster
- D. Configure the snapshot for shared file systems

**Answer: A**

### Question: 6

An administrator is preparing to upgrade a PowerFlex cluster. What steps should they follow to ensure success?

Response:

- A. Backup the current cluster configuration
- B. Validate hardware compatibility for all nodes
- C. Enable deduplication for all volumes
- D. Verify the cluster health status in PowerFlex Manager

**Answer: A,D**

### Question: 7

Before starting an upgrade, which step is essential to ensure a smooth process?

Response:

- A. Reset all storage pools
- B. Verify cluster health and resolve any issues
- C. Enable deduplication on all volumes
- D. Disable SNMP traps

**Answer: B**

### Question: 8

During a PowerFlex deployment, which steps are required to complete resource discovery?

Response:

- A. Assign IP addresses to all nodes
- B. Validate network connectivity for SDS nodes
- C. Configure storage pools for metadata storage
- D. Deploy vSphere for virtualization

**Answer: A,B**

### Question: 9

While setting up a PowerFlex cluster, an administrator needs to create a Storage Pool. What tasks must they complete first?

Response:

- A. Configure a Protection Domain
- B. Assign drives with consistent performance metrics
- C. Validate VLAN configurations
- D. Enable Fault Sets for redundancy

**Answer: A,B**

### Question: 10

What type of authentication is supported for managing user accounts in PowerFlex?

Response:

- A. LDAP
- B. TACACS+

- C. SAML
- D. All of the above

**Answer: D**
