# Latest Version: 6.0

## Question: 1

In component remote access, which of the following is a primary security consideration?

Response:

- A. Ensuring entertaining user interfaces
- B. Screen saver options
- C. Game compatibility
- D. Using strong encryption

**Answer: D**

## Question: 2

What should be considered when configuring high availability and disaster recovery scenarios for the Blue Prism Application Servers?

(Choose two)

Response:

- A. Blue Prism application natively provides fail over between multiple application servers for a Runtime Resource.
- B. Consider deploying multiple Application Servers for each environment.
- C. Consider the impact of maintenance schedules on the availability of the environment.
- D. Deploy multiple instances of an application server service on a single VM.

**Answer: B,C**

## Question: 3

When process automations are designed appropriately, which connections between Blue Prism devices can support high-latency?

Response:

- A. Interactive Clients to Runtime Resources
- B. Application Server to Runtime Resources
- C. Application Server to Database Server
- D. Application Server to Interactive Client
- E. No components can be supported over a high-latency connection

**Answer: A**

#### **Question: 4**

Which feature is most important in Active Directory for managing user roles and permissions?  
Response:

- A. File sharing capabilities
- B. Group Policy Objects
- C. Media streaming services
- D. Wallpaper customization

**Answer: B**

#### **Question: 5**

Active Directory integration in managing user access primarily provides what?  
Response:

- A. Improved gaming experience
- B. Centralized user management
- C. Enhanced graphic design
- D. Better audio quality

**Answer: B**

#### **Question: 6**

What is crucial when designing a SS&C Blue Prism architecture in a virtualized environment?  
Response:

- A. High-resolution graphics
- B. Resource allocation and distribution
- C. External USB support
- D. Background music options

**Answer: B**

#### **Question: 7**

Which of the following statements is true, when considering Virtualizing the Blue Prism Database Server?

Response:

- A. Virtualization of the database server should only be considered after fully reviewing the specific vendor recommendations for the Hypervisor and SQL server version
- B. The Database server should never be virtualized
- C. Virtualization is only supported on Vmware Hypervisor technology
- D. Virtualization should be considered only in very small environments

**Answer: A**

### Question: 8

What restrictions should be considered if using XenDesktop for delivery of the Runtime Resources? (Choose two)

Response:

- A. Login Agent must be used to initiate the login to the device vs the Citrix Client.
- B. Only version 5 of Blue Prism is supported with XenDesktop.
- C. Login Agent is only supported from version 7.6 of XenDesktop, due to restrictions on 3rd party credential provider support prior to this.
- D. XenDesktop is not a supported platform for the Runtime Resource.
- E. Surface Automation will need to be used for all automations.

**Answer: A,C**

### Question: 9

Why is it important to control remote console access to the Runtime Resources?

Response:

- A. Because runtime resources are used to control the scheduling of processes
- B. Because runtime Resources will always have administrative level access to the Blue Prism database
- C. Because Runtime Resources will always have administrative level access to the Blue Prism control room
- D. Because Runtime Resources will be executing automations, where data may be visible or a transaction could be manually interfered with

**Answer: D**

### Question: 10

For Blue Prism in a virtualized environment, which of these factors is most important for performance?  
Response:

- A. Virtual machine's color depth
- B. Number of installed games
- C. Virtual CPU and memory allocation
- D. Desktop wallpaper settings

<b>Answer: C</b>
