## Question: 1

A company needs to preconfigure firewalls to be sent to remote sites with the least amount of reconfiguration. Once deployed, each firewall must establish secure tunnels back to multiple regional data centers to include the future regional data centers.

Which VPN configuration would adapt to changes when deployed to the future site?

- A. Preconfigured GlobalProtect satellite
- B. Preconfigured GlobalProtect client
- C. Preconfigured IPsec tunnels
- D. Preconfigured PPTP Tunnels

**Answer: A**

## Question: 2

A client has a sensitive application server in their data center and is particularly concerned about resource exhaustion because of distributed denial-of-service attacks.

How can the Palo Alto Networks NGFW be configured to specifically protect this server against resource exhaustion originating from multiple IP addresses (DDoS attack)?

- A. Define a custom App-ID to ensure that only legitimate application traffic reaches the server.
- B. Add a Vulnerability Protection Profile to block the attack.
- C. Add QoS Profiles to throttle incoming requests.
- D. Add a DoS Protection Profile with defined session count.

**Answer: D**

## Question: 3

A client has a sensitive application server in their data center and is particularly concerned about session flooding because of denial of-service attacks.

How can the Palo Alto Networks NGFW be configured to specifically protect this server against session floods originating from a single IP address?

- A. Define a custom App-ID to ensure that only legitimate application traffic reaches the server

- B. Add QoS Profiles to throttle incoming requests
- C. Add a tuned DoS Protection Profile
- D. Add an Anti-Spyware Profile to block attacking IP address

**Answer: C**

#### Question: 4

A Company needs to preconfigured firewalls to be sent to remote sites with the least amount of preconfiguration. Once deployed, each firewall must establish secure tunnels back to multiple regional data centers to include the future regional data centers.

Which VPN configuration would adapt to changes when deployed to the future site?

- A. preconfigured GlobalProtect satellite
- B. preconfigured GlobalProtect client
- C. preconfigured IPsec tunnels
- D. preconfigured PPTP Tunnels

**Answer: A**

#### Question: 5

A client has a sensitive application server in their data center and is particularly concerned about resource exhaustion because of distributed denial-of-service attacks.

How can the Palo Alto Networks NGFW be configured to specifically protect this server against resource exhaustion originating from multiple IP address (DDoS attack)?

- A. Define a custom App-ID to ensure that only legitimate application traffic reaches the server
- B. Add a DoS Protection Profile with defined session count.
- C. Add a Vulnerability Protection Profile to block the attack.
- D. Add QoS Profiles to throttle incoming requests.

**Answer: B**
